CIRCO Hub Portugal CRIAR NEGÓCIOS ATRAVÉS DO DESIGN CIRCULAR

PROGRAMA INTERNACIONAL

PARCERIA

FINANCIAMENTO

Governmental agency for competitiveness and innovation, in the scope of the Ministry of Economy and Maritime Affairs. Includes an SME academy, which promotes capacity building of good business practices towards competitiveness and growth. Training, facilitation, engagement of companies, dissemination, certification of the training.

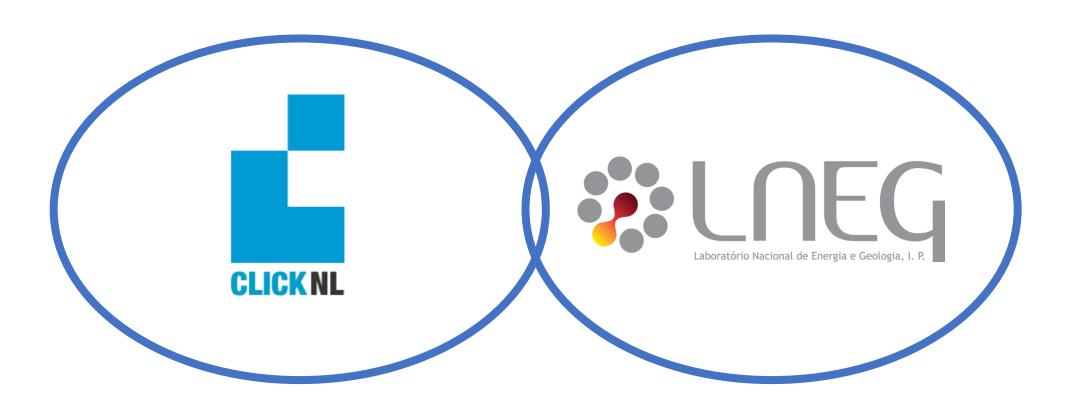

Environmental Protection Agency, responsible for the implementation of environmental policies in Portugal, under the rule of the Ministry of Environment and Climate Change. Facilitation, folow-up, dissemination.

Funding mechanism for the implementation of environmental policies in Portugal, managed by the General-Secretary of the Ministry of Environment and Climate Action. Circular design was included in the Portuguese Circular Economy Action Plan. Financing.

Technical cooperation agreement

CIRCO

Hub Estonia

CIRCO

Hub Germany

Objective and targets

Incentivate circular economy through design

Companies and designers work together to jointly develop circular products, services and business models, following a well-developed and tested methodology (CIRCO Programme, NL)

Targets:

- Capacity-building of 90-100 companies, 2 representatives/company, that participate in circular business model development tracks (series of 3 workshops)
- Training 60 designers, that participate in 2 half-day classes about CIRCO circular design

1 July 2021

M Estratégias de design e respetivas implicações na Proposta de valor

Estratégias de design e respetivas implicações na proposta de valor

Aplicação das estratégias de Design Selectore 3 estratégias de Design relevantes para a proposta de vaor circular e justifique a sua escoha.	Desenhe ou escreva as suas ideias Aplique a estratégia de Design. Desenhe ou descreva os requistos de produto necessários em cada estratégia.
Estratégia de Design A Facilidade de manutenção e reparo	O produto não irá possuir nenhum componente colado permanentemente nem dois ou mais tipos de plástico fundidos permanentemente. As zonas de acesso ao interior do produto precisam estar facilmente amovíveis, evitando elementos de fixação permanente.
Estratégia de Design B Montagem e Desmontagem	Possibilidade de desmontagem e substituição de componentes pelo próprio cliente.
Estratégia de Design C Atualização e adaptação	O design permite que os componentes eletrónicos sejam atualizados pela empresa e os softwares sejam atualizados pelo utilizador.

Solução Circular.

Com um design que possibilita tanto a reabilitação por parte da empresa ou do cliente, se necessário, o produto nunca chega ao fim de vida. Uma situação a considerar é o destino das partes que são substituidas. (Poderão ser recondicionadas e utilizadas para novas situações ou precisarão ser recicladas ou descartadas?)

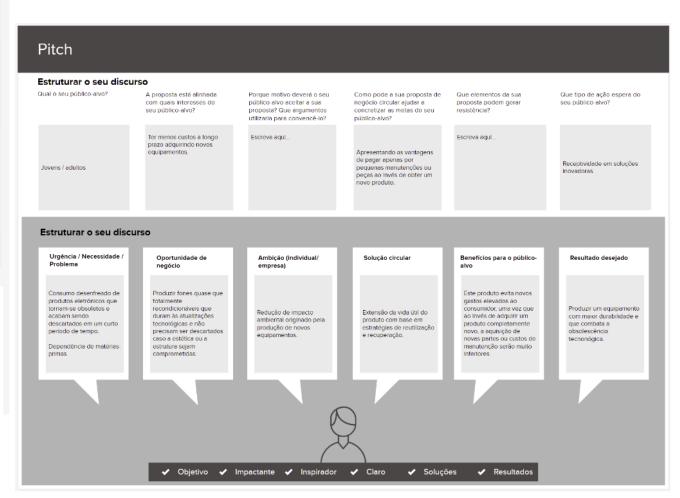

A responsabilidade pela disponibilidade de peças, serviço de manutenção e possivelmente recolha de peças substituídas pelo utilizador será da empresa que realizou o produto.

Extensão da vida útil do produto sem que haja a necessidade de substituição por um novo.

(example for design strategies, circular solution & pitch)

Vocational training certificate

Certificado de Formação Profissional

All trainees received a certificate

- Companies: total 22 hours
- Designers: total 7,5 hours

Companies tracks: overview

Results

Objectives

10 tracks
90-100 companies
2 participants per company

12 tracks: September 2021 – July 2023

191 companies registered for training
133 considered elegible for participation according to the method

95 Companies participated and completed the training

225 professionals trained with CIRCO

4 workshops60 Designers

Results

4 Workshops

170 registrations
76 confirmed for training
47 participants in the workshops

Online survey

Phase 1

- 55 companies that participated in the training between September 2021 and July 2022
- 47 responses (85% response rate)

Phase 2

- 40 companies that participated in the training between November 2022 and July 2023
- 24 responses (60% response rate)

71 responses (75% response rate)

- Characterization of companies and respondents
- General benefits
- Results
- State of implementation of the solutions developed during the project
- Obstacles to implementation
- Recommendations (open question)

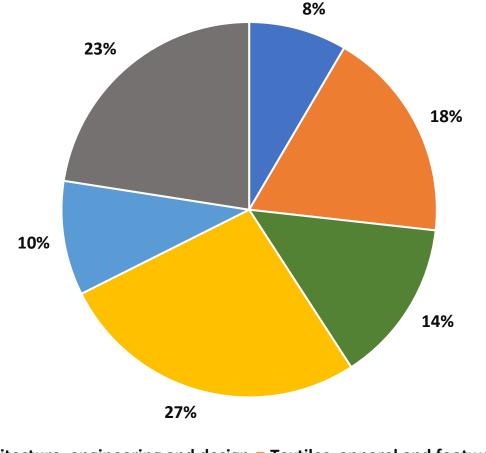

Online survey – Sectors/product groups

Most represented sectors/product groups:

- Building products and furniture (27%)
- Food products + packaging (24%)
- Textiles, apparel and footwear (18%)

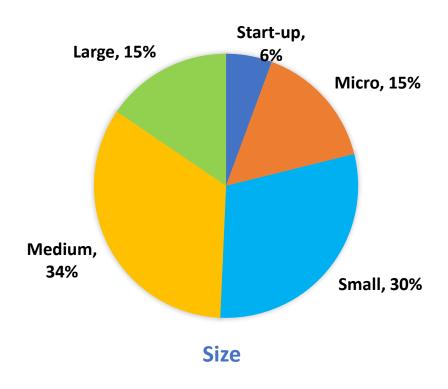

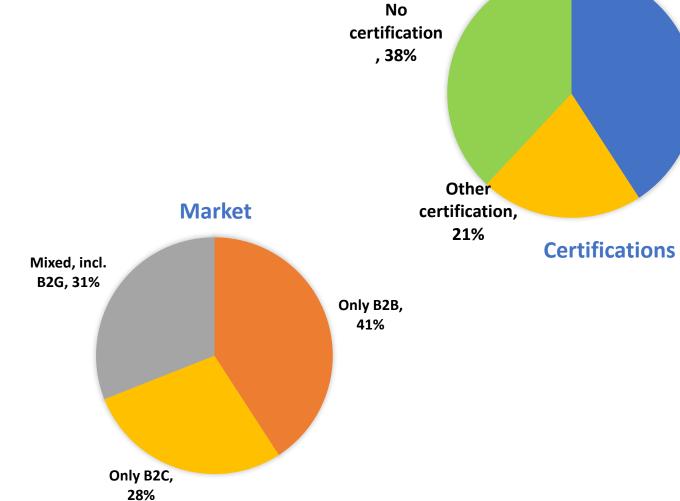

- Food products Building products and furniture
- Packaging Others

Online survey – Size, market and certifications

Env/Sust

certification,

41%

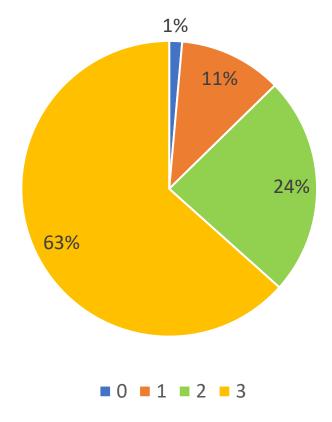

Online survey – Success

Success criteria	Scoring
Advancement of at least 1 degree in knowledge about CE , reaching at least level 4: high (self-evaluation, 5 points)	1
The company continued working on the circular BM/product developed during the track (Yes/No)	1
The company intends to continue working on circular design in other projects (Yes/No)	1
None of the above	0

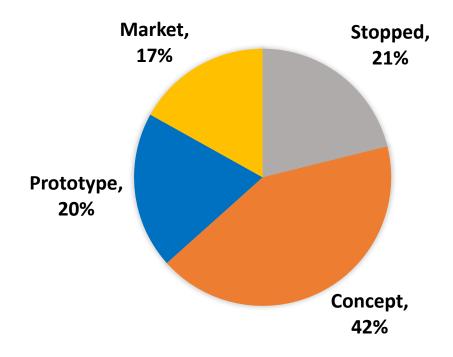

Distribution of companies per success level

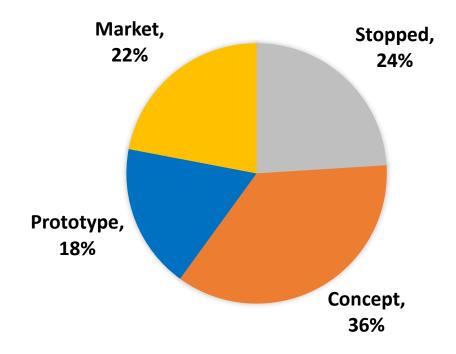

Online survey – Status of implementation

All responding companies

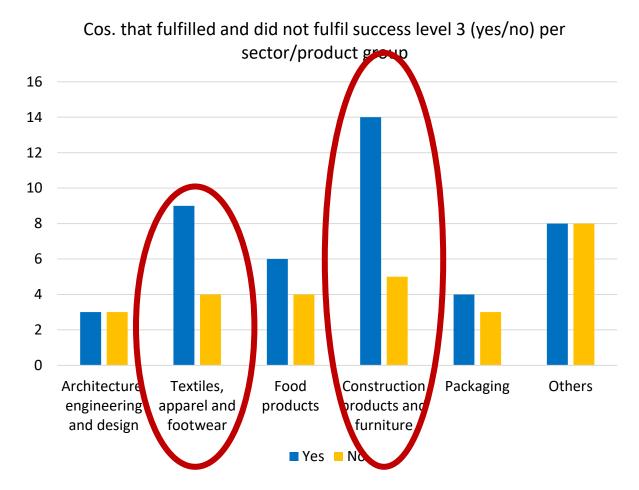

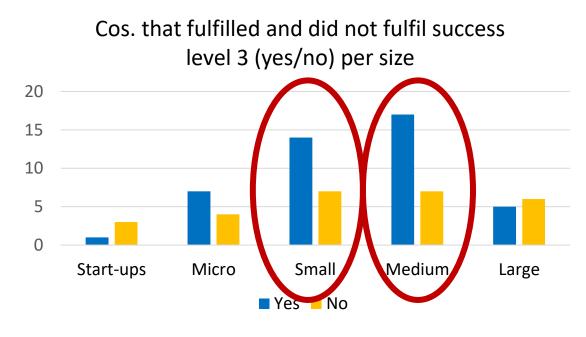

Time lapse between track and survey > 6 months

Online survey – Relations sector and size/success

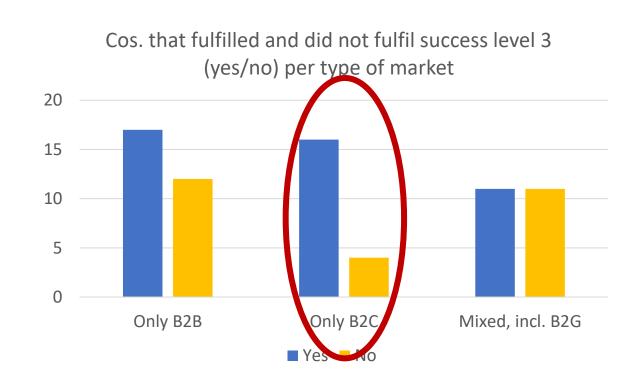

Online survey – Relations certifications and market/success

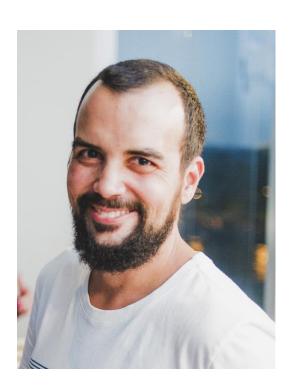

Online survey – Obstacles to implementation

- At institutional/market level
 - Low price of virgin raw materials compared to secondary
 - Difficulty in securing **funding** for circular BMs
 - Public procurement policies not oriented towards sustainability
 - Regulatory barriers/uncertainty regarding future EC legislation
- At the value chain level
 - **Time** needed to establish new partnerships and mutual trust
 - Ensure the quality of recovered products, components or materials
 - Ensure adequate product, component and material return flows
 - Investments in the manufacturing facilities of the company/value chain
- At the organizational level
 - Need for new technological resources
 - Lack of indicators to monitor progress in CE
 - Lack of internal HR, knowledge and skills
 - Difficulties in return on investment
